

Dear Newsagent,

You will have been informed that GGA has identified a number of newsagents who will no longer have to return physical copies to them by consistently providing accurate and reliable data to GGA via XchangeIT.

XchangeIT will be playing an active role in ensuring you have the opportunity to participate in this program by providing GGA with regular updates on agents that achieve our gold class level. We will be communicating to you further details on the upgraded ITC parameters and Variance checks from mid-January 2017 to assist you in obtaining this level of compliance.

Once you have obtained gold class level, GGA will initiate a number of specific checks to ensure your sales v returns error margins fall within their parameters. If you have questions on this specific part of the project please contact GGA at contactus@gordongotch.com.au.

Well done to those newsagents who have been identified for the start of the project and we look forward to helping other stores reach the Gold Level standard in 2017 so they too can take part in the initiative.

Sincerely,

The XchangeIT Team
